

Where Can We Help You Go Beyond?

Polymer seals, metal seals, composites & polyimide materials in the turbines improve engine performance.

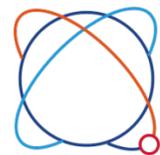

AVIATION

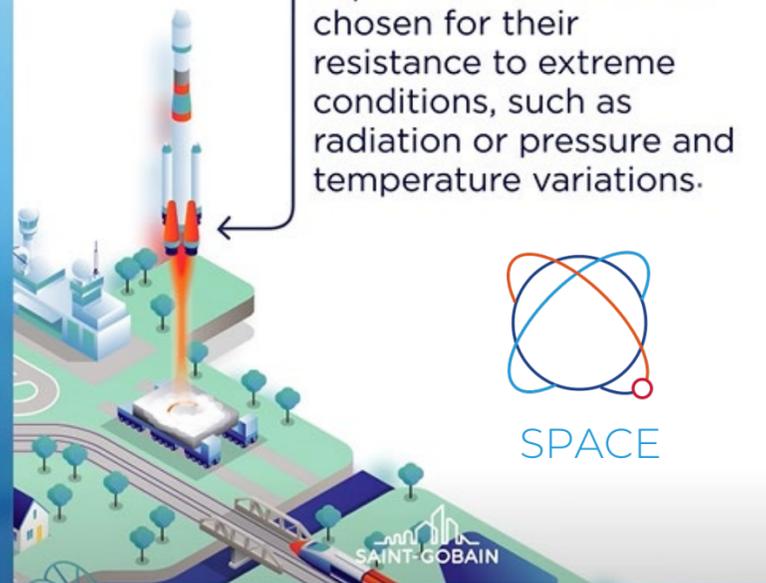

BEYOND
the boundaries of possible

Seals, bearings and composite materials used on satellites and exploration vehicles are chosen for their resistance to extreme conditions, such as radiation or pressure and temperature variations.

SPACE

Polymer seals & materials are used in wearable/portable insulin pumps by diabetic patients. A tighter seal significantly reduces and prevents leakage.

LIFE SCIENCE

#MovingYou

The suspension **seals** improve cyclists' comfort.
